OBJECTIVE

Professional with always automation first approach

SKILLS

- Ruby
- kubernetes / Docker
- Linux
- Elasticsearch
- Rundeck
- Chef / Ansible
- New Relic / Grafana
- Python , JavaScript, Shell
- AWS
- Puppet
- Nextjs
- Github Actions

ACHIEVEMENTS

- Standout Performance Award

LANGUAGES KNOWN

- English
- Hindi
- Marathi
- Urdu

HOBBIES

- Travelling
- Cooking
- Learning New Things

WORK EXPERIENCE

Software Engineer
Perforce Software
May 23 - Present

Developing forge.puppet.com having backend on sinatra

Managing open source Puppet modules

Managing puppet modules CI with Github-Actions

Writing automations around slack using Bolt

Created forge deployment automation from scratch

Created new search feature for forge

Site Reliability Engineer
Coupa Software
Oct 21 - May 23

1. AWS services - EC2,S3,lambda,EBS,route53,RDS,IAM,EKS,VPC

2. Managing infrastructure of Rundeck and writings jobs for dev and prod environment to create automations to manage AWS/Azure assets and configuration management

3. Developing and managing Elasticisearch infrastructure of about 50 clusters in multiple regions with biggest cluster having 40 data nodes for searching and logging (RabbitMq+logstash+Kibana)

4. Maintaining Elasticsearch cluster health and performance by rightsizing the cluster for cost optimisation along with low latency

5. Maintaining Elasticsearch to latest version with seamless upgrades using automations. Migrated Elasticsearch from V.7.14 - V.7.17 - V.8.3
